

Dear Dunmore High Rise Residents:

We will be having a Professional Cleaning & Sanitizing Service coming to our site on Friday, April 10, 2020. The Housing Authority of the County of Lackawanna is committed to the Health and Safety of our Residents. You will be able to stay in your apartment, but ask you to be mindful of these professionals as they complete their work.

Thank you for your cooperation.

Housing Authority of the County of Lackawanna
Patrick Padula
Executive Director

Dear Blakely High Rise Residents:

We will be having a Professional Cleaning & Sanitizing Service coming to our site on Friday, April 10, 2020. The Housing Authority of the County of Lackawanna is committed to the Health and Safety of our Residents. You will be able to stay in your apartment, but ask you to be mindful of these professionals as they complete their work.

Thank you for your cooperation.

Executive Director

CLEANING PROCESS

Step One

When we arrive onsite we will set up a hydroxyl machine to clean the air throughout the space.

The Hydroxyl Generator can help purify air and improve indoor air quality by decomposing organic and inorganic air contaminants. It is safe for use in occupied areas. This machine will remove bacteria, and airborne viruses

- Produce zero ozone
- Safe to use in occupied areas
- Treats up to 40,000 cubic feet

Step Two

Our employees will fog all of the areas being sanitized with Ryobi Foggers followed up with with battery charged backpack sprayers applying tested and eco friendly Sanitizer / disinfectant

Our privately labeled cleaner & Disinfectant kills 99.9% of Illness causing germs and bacteria on contact, **Has a kill rating for coronavirus**, and when applied, keeps on self sanitizing for up to 30 days.

Our cleaner / disinfectant goes on in minutes and is non harmful to both people and the environment.

- * **Kills 99.9% of illness-causing germs - For up to one month**
- * **Made with organic compounds**
- * **Triclosan- free**
- * **Water Based, odorless**
- * **Non-toxic, safe for humans**
- * **Environmentally safe**
- * **Applies in minutes and drives fast**

Step Three

Our last step will be to hand wipe all heavily touched areas to clean and add film thickness for longer lasting sanitation. Items we will be hand wiping will include, but are not limited to: doorknobs, hand railings, desks, tables, countertops, water fountains, chairs, elevators, thermostats, trash chute doors, washers, dryers, mailboxes, restroom fixtures, faucets, and any other high touch areas According to the type of business, or space being sanitized.

Patrick Padula,
Executive Director
